

Polycom SpectraLink 8400 Series

Call Server Interoperability

The table below lists the call servers that have been tested as interoperable with the SpectraLink 8400 series handsets. Only products listed in the table have been tested for compatibility and acceptable performance with SpectraLink 8440/8450/8452. Polycom does not recommend or support deployments with products not listed in the table. This document will be updated as additional call servers are tested. Interoperability and configuration documents are found on the Polycom [SpectraLink 8400 Support](#) page.
